

Blue condensate drain pipe reinforced by under-track Ø 20 single cladding - Sleeves Ø 18/20

- cod. 11126346 - cod. SCD300094 - cod. SCD300003

DESCRIPTION

The corrugated condensate discharge pipe Ø20 is made in anti-UVA pale blue polyethylene with single coating. Packaged in 50 m rolls or 25 m mini-rolls.

Every 52 cm there are Ø18/20 m/f fitting sleeves; this helps to cut the pipe to length to avoid wasting material.

The pipe is equipped with a pressure fitting on the built-in installation box.

The materials used, along with the new corrugated shape, guarantee high flexibility and mechanical resistance to crushing, making the pipe ideal for buried applications.
