

Condensate drain pipe reinforced by under-track Ø 20 single cladding with o-ring

- cod. 11126346T

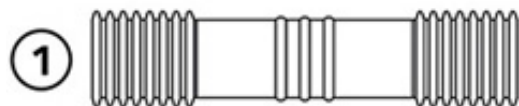

DESCRIPTION

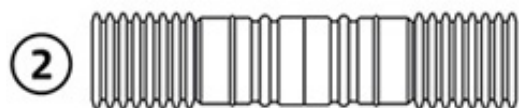

The corrugated condensate discharge pipe Ø20 is made in anti-UVA white polyethylene with single coating. Packaged in 50 m rolls complete with o-ring, and every 52 cm there are Ø18-18/20-20 fitting sleeves; this helps to cut the pipe to length to avoid wasting material.

The materials used, along with the new corrugated shape, guarantee high flexibility and mechanical resistance to crushing, making the pipe ideal for buried applications.

DIMENSIONS

[1] Female sleeve

[2] Male sleeve
