FUNCTIONS

- Communicates directly with the system control unit
- The dampers connect to each other by means of the cascading system
- The connection cable used is of the 8-wire telephone type with RJ45 plug connection
- Appropriately configured using the “Polaris 4X” and “Polaris 5X” control units, the damper can take on the function of a motorised circular bypass.

ATTENTION!

Use only Tecnosystemi cables - do not use cables other than those indicated in order not to compromise the correct functioning of the system.

There must always be an inspection hatch to access the control unit and the dampers.

Always install the dampers with the motor facing downwards.
