

Descaling liquid for heating systems

- cod. 27200015

DESCRIPTION

The descaling liquid for heating systems frees the circuits from rust, sludge sedimentation and limescale, increasing the performance of the system.

The product is used for the restoration of old systems or for cleaning in case of restoration.

The liquid can be used with all materials used in heating systems such as aluminium, steel and synthetic materials.

Note: do not exceed the temperature of +50°C in the system. The heating system must be free from any additional substances (antifreeze, self-sealing liquids, salt water).

Follow the instructions for use carefully to avoid damage to the control valves and pumps. Remove the cleaning liquid from the system after cleaning.

Method of use: 1% (1 litre of descaling liquid in 100 litres of heating water).

Attention: the product must not be overdosed or underdosed.
