DESCRIPTION

The AIRBOX plenum in PS (polystyrene) plastic is the ideal solution for an efficient controlled mechanical ventilation system (VMC).

AIRBOX offers easy installation and integration with the installed ventilation system.

The plenum is equipped with Ø75 or Ø90 sleeves used to connect the VMC pipes at the rear, top or side.

The sleeves are complete with pipe holder and screwdriver-adjustable calibration dampers used to balance the air flow in the room.

The plaster protection cover Utile, complete with removal handle, is also useful.

The designer grilles Gemini, Virgo, Aries and Taurus are available to complete the plenum.

APPLICATION:

AIRBOX is applied to residential and commercial controlled mechanical ventilation systems.

AIRBOX is designed for fixing on plasterboard or walls with a minimum depth of 100 to 150 mm.

Fixing on plasterboard with self-threading screws is made easier with the side flaps.

The flaps can be removed for brick wall installation.

CONTENTS OF KIT ACD600088

- 1 AIRBOX PRO plenum
- 1 sleeve diameter Ø75
- 1 gasket diameter Ø75
- 1 plenum lid with con spirit level
- 1 wall bracket kit (4 wall brackets + 4 screws plaster)
- 4 caps

CONTENTS OF KIT ACD600092

- 1 AIRBOX PRO plenum
- 1 sleeve diameter Ø90
- 1 gasket diameter Ø90
- 1 plenum lid with con spirit level
- 1 wall bracket kit (4 wall brackets + 4 screws plaster)
- 4 caps
