

DATASHEET

rev. 01 - 10/11/2022

Spray grease

11132133

DESCRIPTION

Specific to eliminate the friction of any mechanical part.

The product does not contain silicone and is characterised by its excellent adhesive properties, stable viscosity and optimum penetration.

Resistant to water pH from 2.5 to 11.

Compound based on high quality saponified fats.

It is an excellent protection, it is water-repellent, it has high resistance to salt, acid and alkaline solutions and to weathering in general.

TECHNICAL SPECIFICATIONS:

- Straw-coloured appearance
- PH approximately 8.5
- Flash point lower than 0°C
- Relative density: 0.85 gr/ml approx.
- Solubility in water: insoluble
- Lipid solubility: soluble
- Does not contain heavy metals
