

## Consumption meter for PROAIR system

GAD100014

### DESCRIPTION

The consumption meter for "ProAir" system, measures the instantaneous power boost of the machine combined with the "Polaris 5X" control unit and records the energy from the moment power supply is delivered to the same. The data are stored in the "Polaris 5X" control unit or in the "Proair Multi-zone" app, broken down by day, week, month and year. The dialogue with the control unit is via RF.

### TECHNICAL SPECIFICATIONS:

- 2 modules dimensions W 70 x H 90 x D 62
- Fastening on DIN rail
- Radio frequency data transmission with the "Polaris 5X" control unit
- Current sensor supplied
- LEDs for signalling and diagnostics
- Can only be combined with "Polaris 5X" control unit
