

DATASHEET

rev. 00 - 28/11/2022

Sanitising protector with anti-scalant and corrosion inhibitor for radiant systems

27200035

DESCRIPTION

The liquid is a biocide based on organic compounds to be applied in thermal circuits to contain the growth of mould, fungi and bacteria.

The product, intended exclusively for industrial and civil uses, is not usable in drinking water systems.

The protective prevents the formation of encrustations, the formation of corrosive phenomena, the development of gases without altering the pH and prevents the growth of bacteria.

Note: do not exceed the temperature of +65°C.

Do not mix with other chemical additives. Carefully follow the instructions for use.

Method of use: 1-2% (1-2 litres of cleaning liquid in 100 litres of water).
