rev. 00 - 28/11/2022

Sludge removing and sanitising cleaning liquid for radiant heating systems (low temperature systems)

27200025

## DESCRIPTION

The sludge-cleaning liquid is a biocide based on organic compounds to be applied in thermal circuits to contain the growth of mould, fungi and bacteria.

The product, intended exclusively for industrial and civil uses, is not usable in drinking water systems.

Note: do not exceed the temperature of +40°C. Do not mix with other chemical additives.

Carefully follow the instructions for use.

Method of use: 1-2% (1-2 litres of cleaning liquid in 100 litres of water).
