

SMART-TOUCH PLUS

programmable chrono-thermostat for room with touch screen

27650070

DESCRIPTION

The programmable room thermostat with touch screen is easy to use and has clear graphics.

It allows use of the external probe and management of the boiler, a zone unit or the switching on and off of a fan coil through the 230 V - 50 Hz 16A / 3600 W output contact.

Using the menu and the various operating modes, it is possible to choose to use it manually or according to the program, to achieve the best comfort in any weather condition as required.

Light in colour, it is wall-mounted and nicely integrates into all environments.
